

Kapitel „Genetic and biol. foundations“: relevante Begriffe/Konzepte)

- Genetic foundations:
 - Gene expression + “The interaction of nature and nurture”
- Biological foundations:
 - Structural regions of neurons
 - Three basic types of neurons
 - Action potential, resting membrane potential
 - The myelin sheath, propagation of action potentials
 - Def. neurotransmitter, 4 categories (one example per category + main function)
 - The nervous system and its functional units/sub-units
