

## **Kapitel „Genetic and biol. foundations“: relevante Begriffe/Konzepte)**

- Genetic foundations:
  - Gene expression + “The interaction of nature and nurture”
- Biological foundations:
  - Structural regions of neurons
  - Three basic types of neurons
  - Action potential, resting membrane potential
  - The myelin sheath, propagation of action potentials
  - Def. neurotransmitter, 4 categories (one example per category + main function)
  - The nervous system and its functional units/sub-units
