

Affirmation of Prescribed Period of Study

The master's degree program in Social, Cognitive and Affective Neuroscience has an prescribed period of study of four semesters (§ 3 examination regulations for the master's program in Social, Cognitive and Affective Neuroscience, Department of Educational Science and Psychology, Freie Universität Berlin).

In the summer break and/or in the third semester, each student has to complete an internship of at least 380 hours. The internship should take place at a research institute in Germany or another country under the supervision of an experienced scientist. Before starting an internship abroad, the student should reach an agreement with the internship coordinator covering the duration and the host organisation of the internship.

To successfully complete the Master's degree the students of the Master's program in Social, Cognitive and Affective Neuroscience have to come back to the Freie Universität to do their master's thesis. The Master's thesis is followed by an oral examination. Both should take place in the fourth semester of the master's degree program.
