

Kurzdarstellung zum Bereich „EDV-Kenntnisse“

Im Zeitraum 6. bis 10. März 2006 wurden am OSZ für Informations- und Medizintechnik insgesamt 447 Schülerinnen und Schüler einer Untersuchung zum Alltagswissen und ausgewählten Themen im EDV-Bereich untersucht. An dieser Stelle sollen kurz einige Befunde zum Kenntnisstand im EDV-Bereich berichtet werden, die sich auf einen Stichprobenumfang von $N = 429$ beziehen. Inhaltlich wurden die Facetten „Internet“, „Hardware“ und „IT-Bereich“ abgebildet.

Abbildungen 1a und 1b stellen die Verteilung (absolut und prozentual) auf die einzelnen Klassen dar. Die stärkste Ausprägung ergibt sich für den Bereich „Berufliches Gymnasium/einjährige Fachoberschule“ (OG/OF), die schwächste für den Bereich „Abitur mit Berufsausbildung“ (BMA)

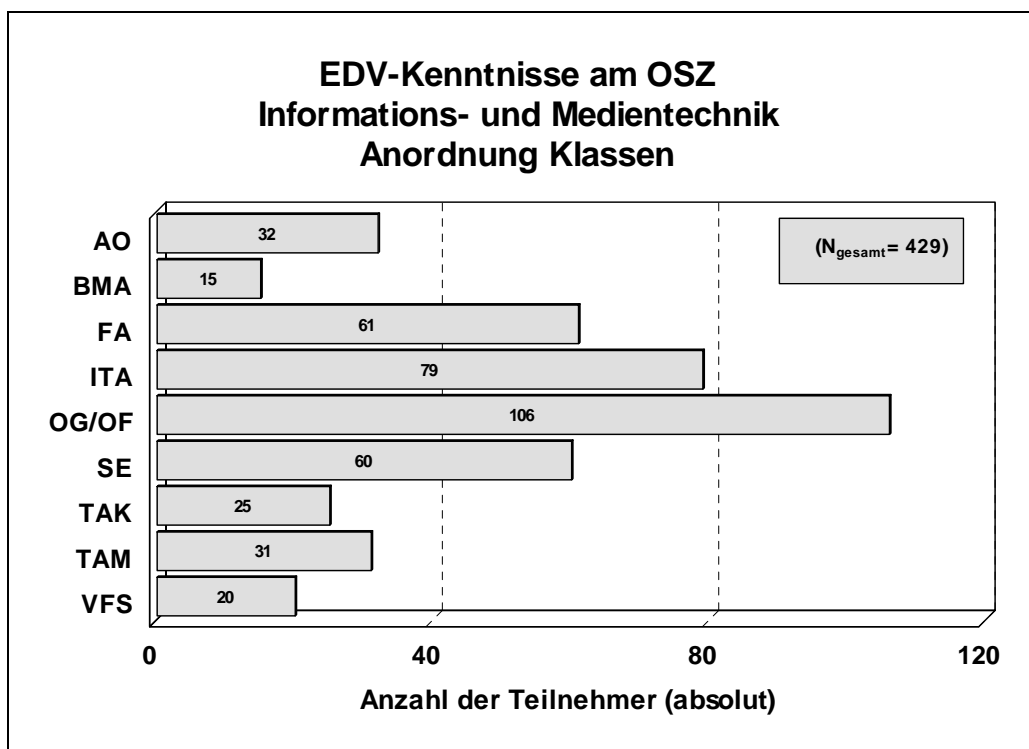

Abb. 1a: Verteilung der Teilnehmer auf Klassen (absolut)

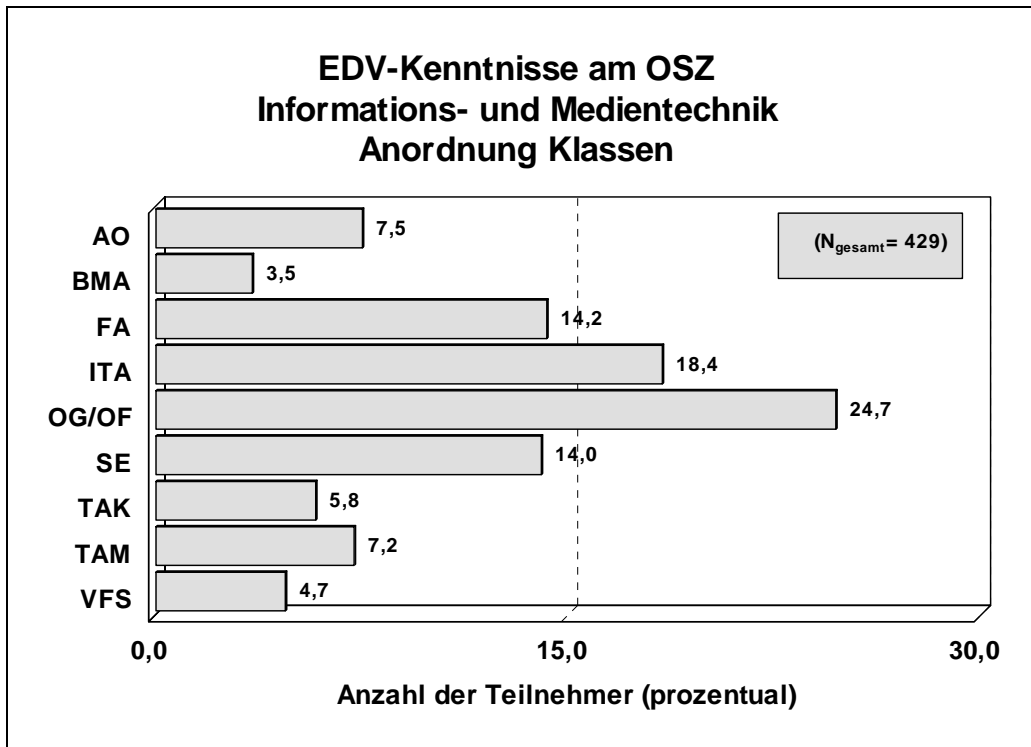

Abb. 1b: Verteilung der Teilnehmer auf Klassen (prozentual)

Bezüglich der Altersverteilung der Teilnehmer/innen sind knapp 50% den Alterklassen 16-18 Jahre zuzuordnen (vgl. Abbildung 2). Davon sind 87,2% männlichen und 12,8% weiblichen Geschlechts (vgl. Abbildung 3).

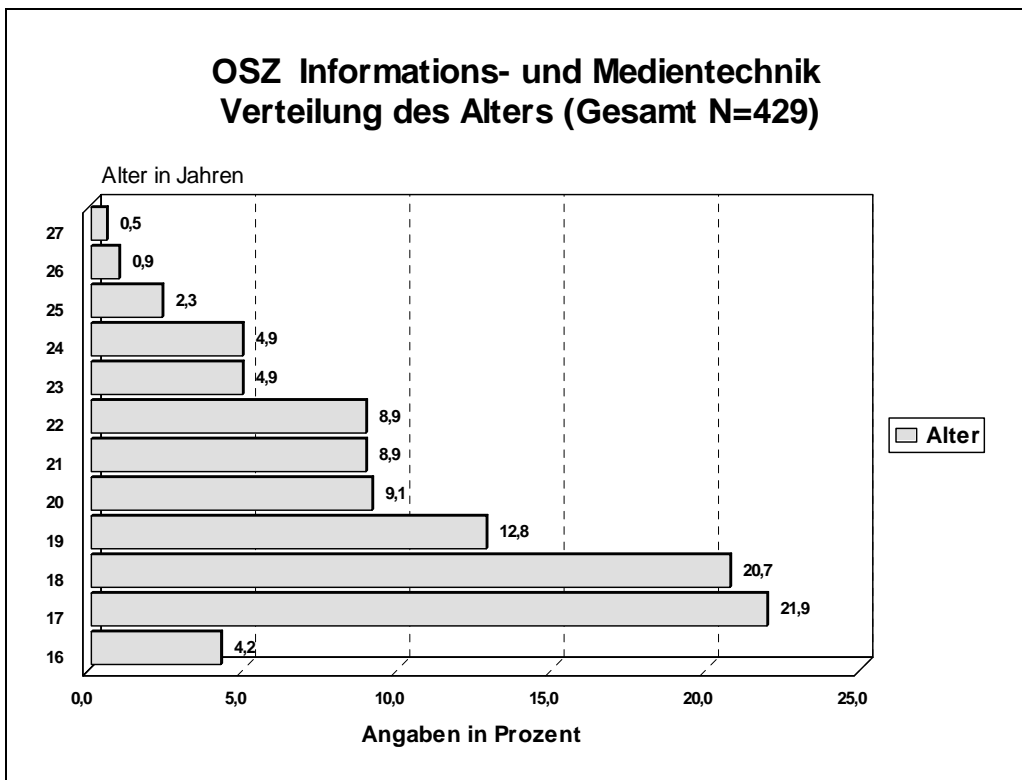

Abb. 2: Alter der Teilnehmer

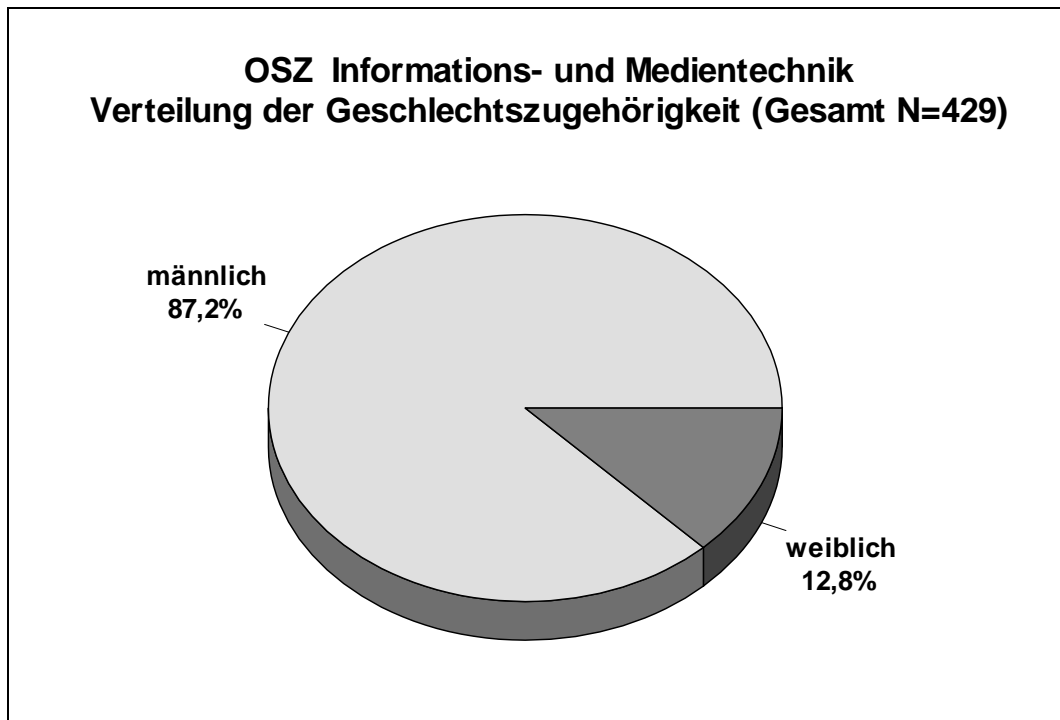

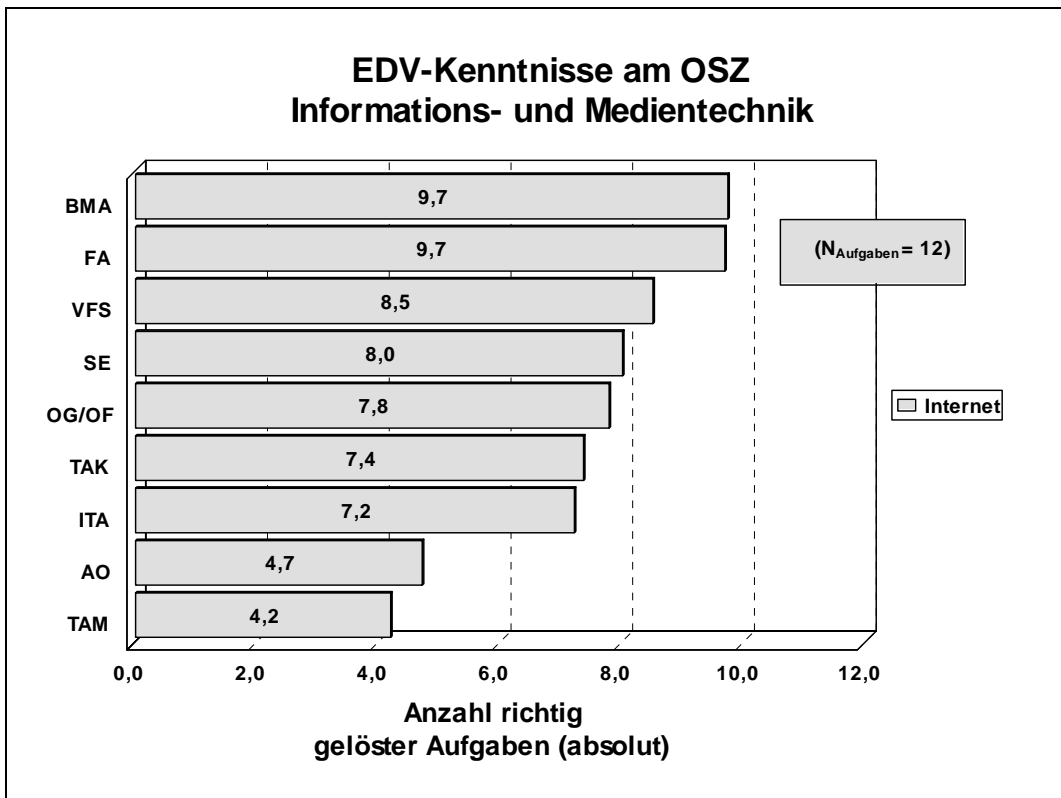

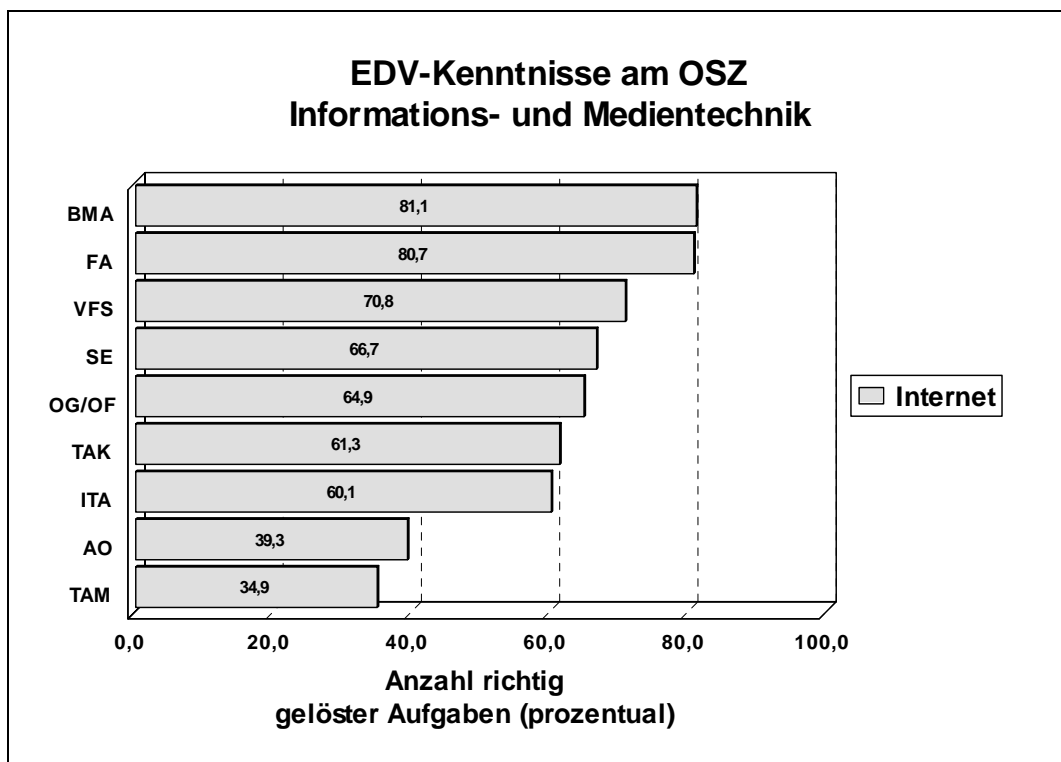

Abb. 3: Geschlecht der Teilnehmer

Im Folgenden (vgl. Abbildungen 4a – 6b) werden die Verteilungen für die drei Inhaltsfacetten (Internet, Hardware, IT) sowohl bezüglich ihres Durchschnitts (absolut als auch prozentual) in Hinblick auf die einzelnen Klassen dargestellt.

*Abb. 4a: Durchschnittliche Leistung der Teilnehmer (absolut)
für den Bereich „Internet“*

*Abb. 4b: Durchschnittliche Leistung der Teilnehmer (prozentual)
für den Bereich „Internet“*

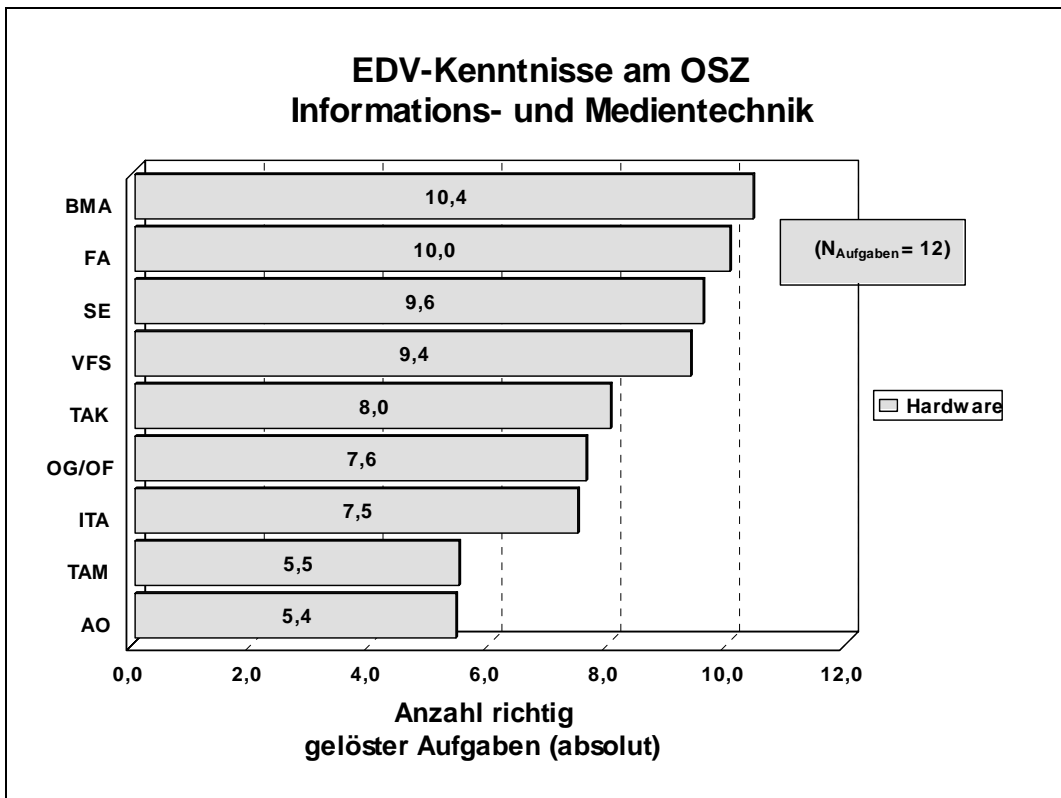

Abb. 5a: Durchschnittliche Leistung der Teilnehmer (absolut) für den Bereich „Hardware“

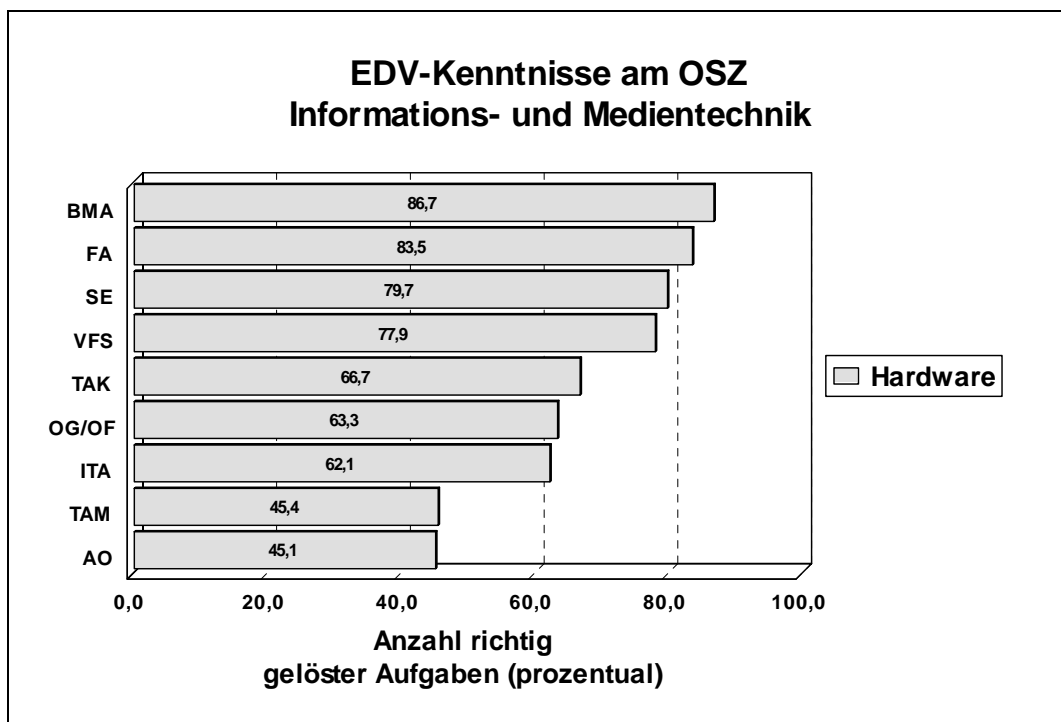

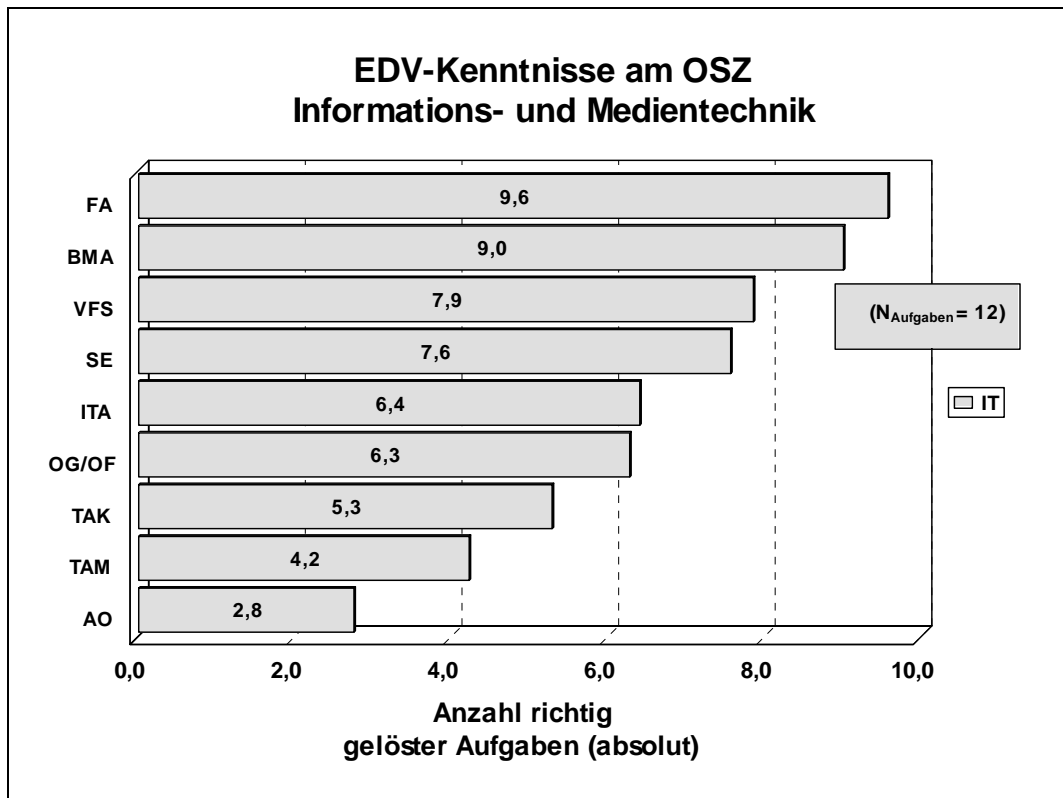

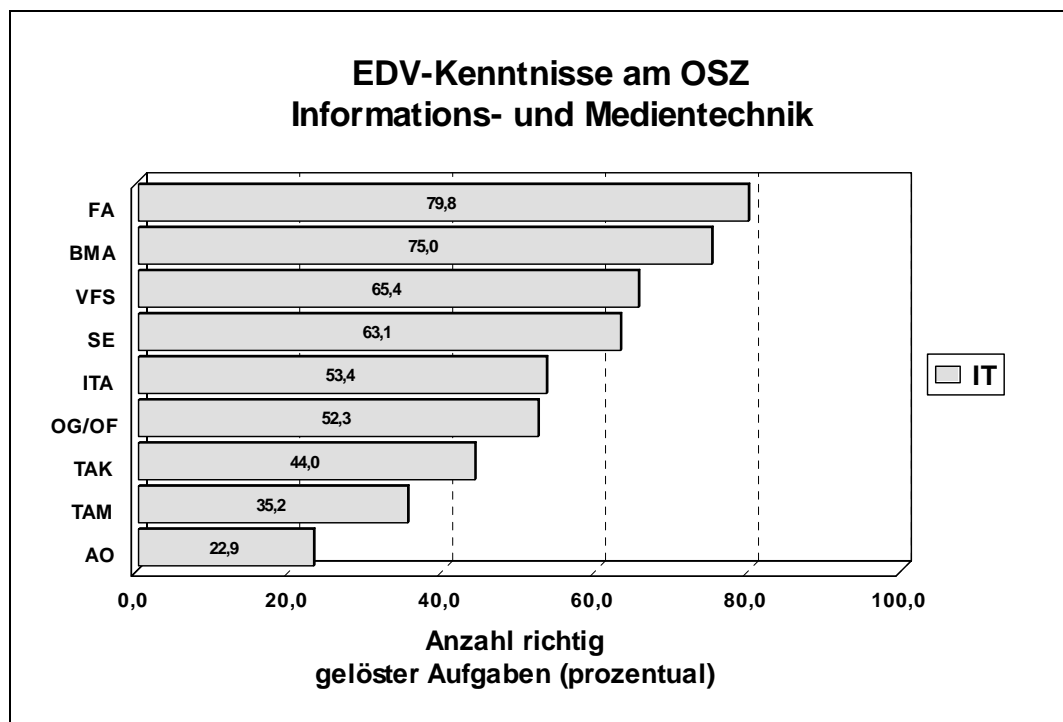

Abb. 5b: Durchschnittliche Leistung der Teilnehmer (prozentual) für den Bereich „Hardware“

*Abb. 6a: Durchschnittliche Leistung der Teilnehmer (absolut)
für den Bereich „IT“*

*Abb. 6b: Durchschnittliche Leistung der Teilnehmer (prozentual)
für den Bereich „IT“*

In drei Klassen (AO, FA und TAM) ergeben sich relativ ausreichende Anteile weiblicher Teilnehmer, so dass eine Gegenüberstellung (vgl. Abbildungen 7 – 9) der prozentual gelösten Aufgaben in den drei Facetten sinnvoll erscheint.

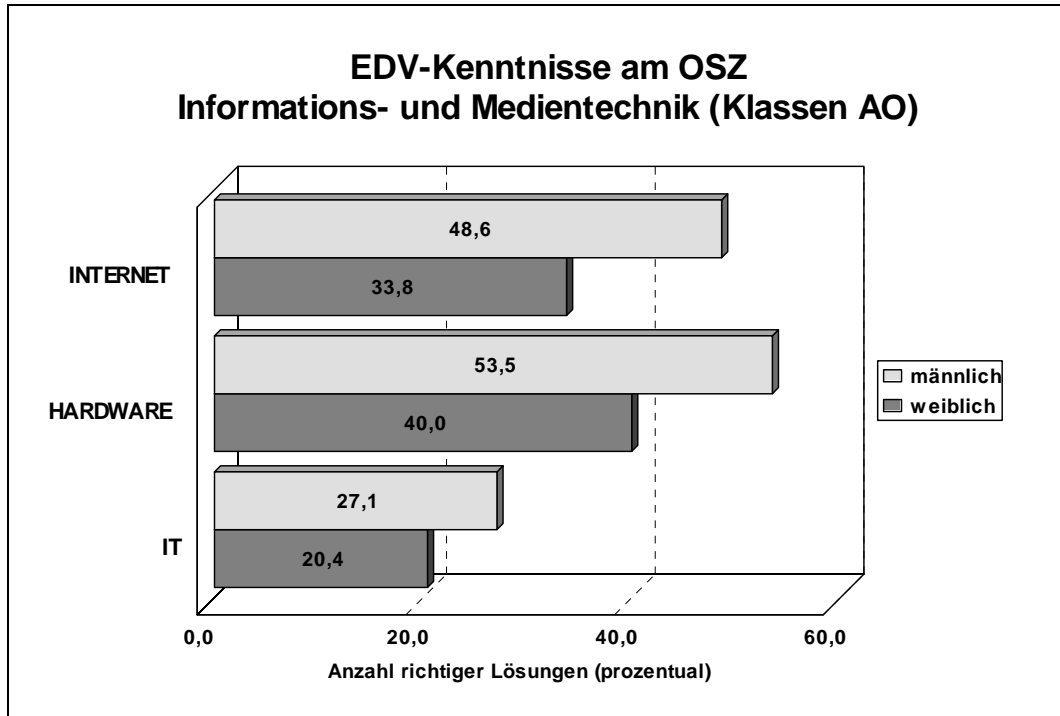

Abb. 7: Durchschnittliche Leistung (prozentual der Klassen AO)
(männliche und weibliche Teilnehmer)

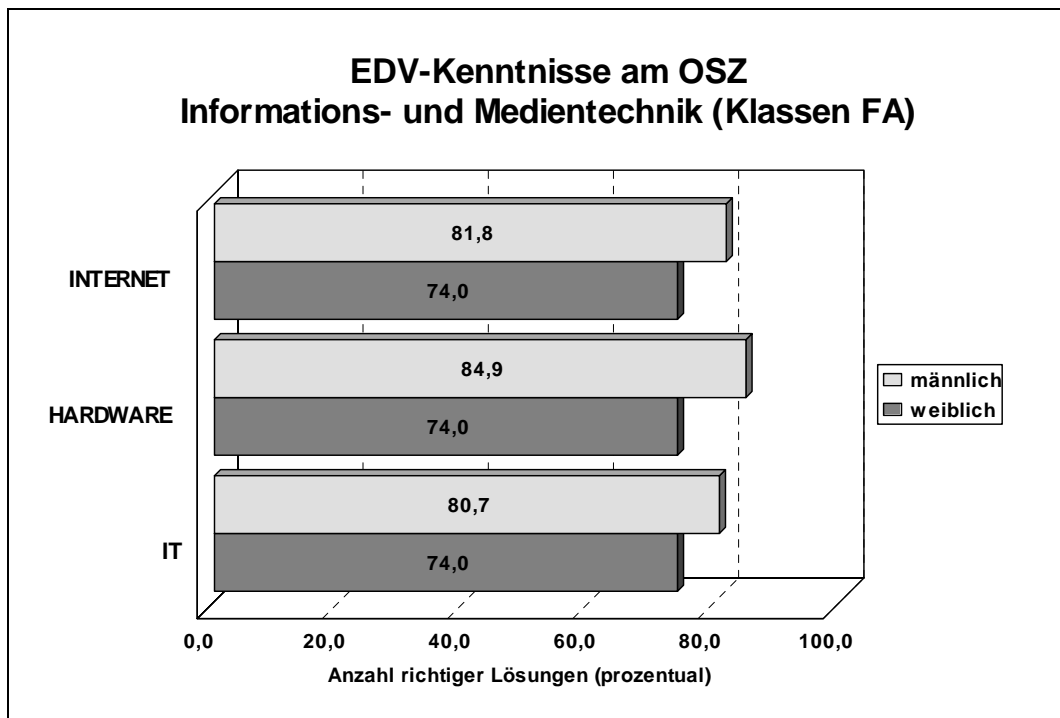

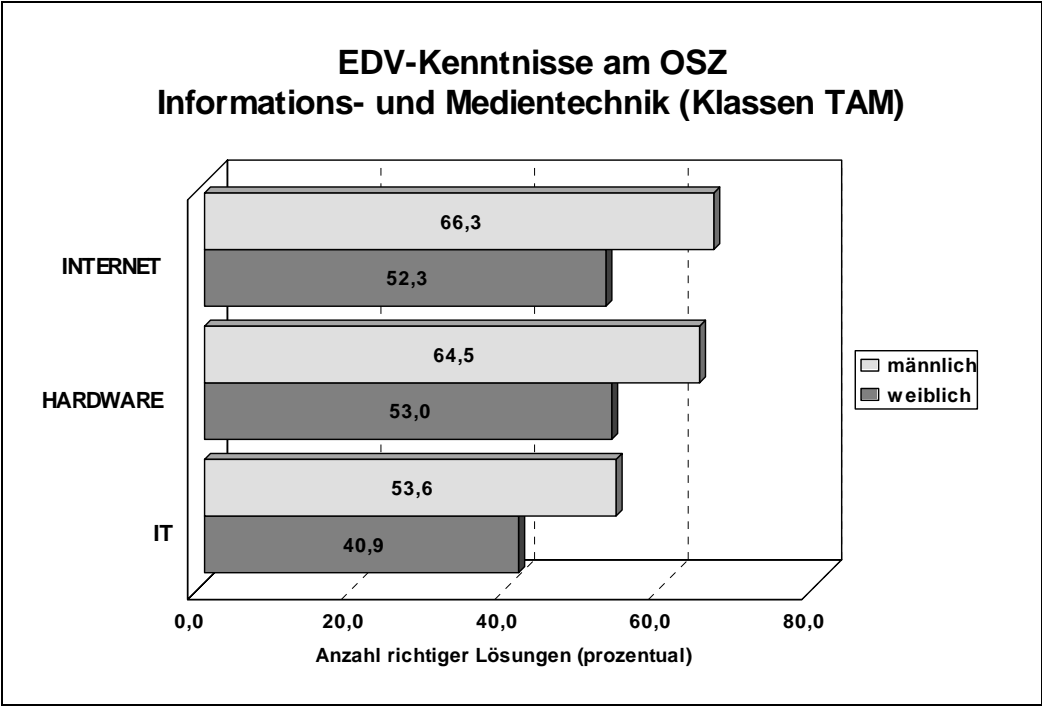

Abb. 8: Durchschnittliche Leistung (prozentual der Klassen FA)
(männliche und weibliche Teilnehmer)

*Abb. 9: Durchschnittliche Leistung (prozentual der Klassen FA)
(männliche und weibliche Teilnehmer)*
