open science workshop

22.09.2017 9.00 – 16.00 Uhr | Seminarzentrum L113

Towards reproducible and transparent research

Open Science Course (MSc/PhD)

Open Science Workshop

9.15 am – 10.00 am

Ruben Arslan

Open Science vs. Bad Science.

10.00 am – 10.45 am

Ulrich Dirnagl

The QUEST Center at the Berlin Institute of Health

10.45 am – 11.15 am

Coffee Break

11.15 am – 12.00 am

Chris Gorgolewski

A practical guide to practicing open science

12.00 am – 12.45 am

Christina Riesenweber

What's the best route to Open Access?

12.45 am – 2.00 pm Lunch Break and Student Poster Session

Open Science Workshop

2.00 pm – 2.30 pm

Caspar Goeke
labvanced

Open Science and Start-Ups

2.30 pm – 3.00 pm

Prateep Beed
Biomimicry

3.00 pm – 4.00 pm

Student Project Presentations

Verbatim Review Discussion 2017

Verbatim Review Discussion 2017

Finally, please make all analysis scripts used for the experimental presentation and evaluation of behavioral/fMRI data available for the readers, e.g. via GitHub or the Open Science Framework as the fullest documentation of the data analytical methods in support of the paper. Please make sure that the code is extensively documented and the link between aspects of implementation (e.g. contrast weights $[-1 \ 1]$) and documentation (e.g. main effect of factor X) is clearly traceable. If possible, please also share the fMRI data. If sharing of the raw data is not possible, please share unthresholded T-maps via NeuroVault.

Dirk Ostwald

If possible, please also share the fMRI data. If sharing of the raw data is not possible, please share unthresholded T-maps via NeuroVault.

Dirk Ostwald

We appreciate the reviewer's best intentions for open science but, unfortunately, we cannot accommodate all requests.

Dirk Ostwald

We appreciate the reviewer's best intentions for open science but, unfortunately, we cannot accommodate all requests.

- Due to the constraints imposed by our [Ethical Committee](#), we cannot share the raw data.

Dirk Ostwald

We appreciate the reviewer's best intentions for open science but, unfortunately, we cannot accommodate all requests.

- Due to the constraints imposed by our [Ethical Committee](#), we cannot share the raw data.
- We now happily provide design matrices for [group-level](#) and PPI analyses in the Supplementary information.
